AUTONOMOUS DRIVING CHALLENGE 2022

Have you ever dreamt of programming a robot to move autonomously?
Do you want to participate in the development of a key technology of the 21st century?
Sign up and take part in one of the best robotics competitions in the world:
Develop fully automated driving functions in a sensorized and state-of-the-art vehicle.

Challenges: localization, navigation, perception (traffic signs, pedestrian crossings, traffic lights) and car maneuvers such as parking and overtaking.
Final event in November 2022.

REGISTRATION DEADLINE: 4 MARCH
