

SPECIAL CHARACTERISTICS OF THE FINAL THESES FOR DOUBLE DEGREES

If you're enrolled in a double degree at the ESEIAAT and the time has come to do your final thesis, you have two options:

Two theses

Request, enrol for and present two separate theses (one for each degree).

A joint thesis

Request, enrol for and present a single joint thesis with an academic load equivalent to the combined academic load of the theses for the two degrees.

1 Supervisor

In this case, you'll have two different theses, each with its own title and supervisor.

In this case, you'll need to have two supervisors and specific competencies for each part of the thesis (related to each degree).

2 Titles

Each supervisor will have to enter the proposal on the Ofertes TFE intranet (for proposed final thesis topics).

You'll have to define a single title, which both of the professors involved must agree to, and which must reflect competencies for both degrees. One of the two supervisors will have to enter your thesis title on the Ofertes TFE platform, specify the relevant competencies and add the other supervisor as a co-supervisor.

3 Application

You'll have to request both thesis topics via the Atenea TFE platform.

You'll have to request the final thesis topic via the e-Secretaria (prisma-nou.upc.edu/).

4 Enrolment

You'll have to enrol separately for each thesis.

You'll have to enrol separately for each thesis.

5 Defence

You'll have to do two thesis defences. Each defence will last 20 minutes. There will be two examination committees (one for each thesis), and you'll receive two official assessment results.

You'll have to defend your thesis in a single 30-minute session, but you'll receive two official assessment results.

⚠ Please note! The two final theses required for a double degree cannot be completed while on mobility.
